

WinSAR telecon, June 19, 2007

Attendees: David Sandwell, Yuri Fialko, Falk Amelung, Sean Buckley, Howard Zebker, Fran Boler, Chuck Meertens, David Phillips,

Summarized by Falk Amelung and David Sandwell.

1. Two new adjunct members approved: CICESE, Ensenada Mexico - Alejandro Gonzales (Adjunct 1, North America) and Institute of Geophysics, CEA, China - Feng Wanpeng (Adjunct 2, world).
2. ESA. Unavco has received invoices from ESA. Unavco will try to automatically verify from the archived data whether all the images have been received. The invoices are over a much higher amount than previously estimated. Possible explanations include wrong billing and/or changes at ESA. It is currently not clear whether multi-frame Envisat swath products cost the product price (25Eur) or the frame price (number\_of\_frames\*25EUR).
3. ALOS. Three WinSAR UPASS proposal have been submitted: US volcanoes (Rowena Lohman, PI), San Andreas system (David Sandwell, PI), Latin and Central America (Matt Pritchard, PI). The volcano data will be covered by the USGS and should go into the DAAC where they will be available for WinSAR. The NSF plans to approve 258 images for the San Andreas. NASA has approved 1000 scenes for South America has been approved. So far no ALOS data have made it into the DAAC.
4. The EC will prepare a newsletter to provide a brief update to the members:  
Topics (can add more):
  - a. Navigating the WInSAR archive at UNAVCO, ERS, ENVISAT and ALOS (Fran, Stuart, etc.)
  - b. How to order ENVISAT data (Fialko)
  - c. Pending WInSAR proposal (link)
  - d. How to get ALOS data at the NASA DAAC (Sandwell)
