

Use of RADARSAT Data Distributed from the UNAVCO Data Center

RADARSAT Data at UNAVCO

UNAVCO has obtained RADARSAT data for distribution to approved users for use in their research and subject to the terms and conditions below. Approved users must be affiliated with WinSAR Consortium member institutions or must have an approved GeoEarthScope “minicat” request. The RADARSAT data at UNAVCO have been obtained from the Alaska Satellite Facility using data credits provided by NASA.

Terms and Conditions for Use of RADARSAT Data

I understand that the RADARSAT data received from UNAVCO can be used only under the following terms and conditions:

- 1) The data are for bona fide research purposes only. No commercial use of the data or any derived products is allowed.
- 2) The data will not be reproduced or distributed to any other parties, except that they may be shared among named members of my research team (co-investigators) who must also be affiliated with my research institution/facility. I will be responsible for compliance with this condition for the data I obtain from UNAVCO. Furthermore, I am responsible for compliance with these terms by members of my research team with whom I share these data.
- 3) I will submit for publication in the open scientific literature results of research accomplished with these data, including derived data sets, and the algorithms and models used. Application demonstrations are not required to supply algorithms or models.
- 4) I agree to provide, if requested, a copy of such results including derived data sets, to UNAVCO for archive and distribution.
- 5) I also understand that a product which involved RADARSAT data in its production can only be freely distributed by me if it is in such a form that the original backscatter values cannot be derived from it.
- 6) I understand that the intellectual property rights of RADARSAT data are reserved solely for the Canadian Space Agency (CSA), and I am entitled only to the right to utilize the data. I agree to clearly mark all RADARSAT data, irrespective of the form in which it is reproduced, in such a way that the CSA copyright is plain to all, as follows:

“© Canadian Space Agency (year of reception).”

Reports or publications describing RADARSAT experiments which are copyrighted must provide royalty free rights for NASA, NOAA, CSA and RADARSAT International (RSI) to reproduce or use such work for their own purposes.

I understand that if these conditions are violated NASA may take appropriate action, including the following:

NASA Investigators: Termination of the research agreement, and potential loss of funding support by NASA. Subsequent access would be under terms for commercial use, as outlined by the respective flight agency.

Other Users: Termination of the research agreement, and notification by NASA to the investigator's sponsoring agency and to the relevant space agency of the violation. Subsequent access would be under terms for commercial use, as outlined by the respective flight agency.

Signed: _____ Date: _____

Printed name: _____

Institution: _____

Research team members with whom I may share data (all must be affiliated with the Institution above) and whose use of the data I accept responsibility for:

Name: _____

Name: _____

Name: _____

Name: _____

If new team members are added subsequent to submitting this agreement, a new copy of the agreement must be submitted to UNAVCO.
